CONFIGURED FOR YOUR ENVIRONMENT & APPLICATION

Cleco MP Series Drills are Industrial grade medium duty drills suitable for a wide range of production and MRO applications. Cleco® Dotco™ pneumatic drills are Industrial high duty grade and are used daily in applications ranging from appliances to aerospace manufacturing. Offered in a variety of configurations, including pistol grip, inline, and right angle, Dotco air drills are designed for the high-volume, high-repetition, high-precision demands of today's assembly lines. Whether a spindle, chuck, motor or angle head, our interchangeable parts allow operators the versatility they need for a range of industrial and manufacturing applications.

PARTS INTERCHANGEABILITY

Maintenance of tools can be time consuming and expensive. That is why our products have been designed with high parts interchangeability. With fewer parts required to repair our tools, less inventory of parts is required and tools are easier to repair.

PRECISION PARTS

It's simple, precision parts let operators manufacture precision products. Whether it is a spindle, a chuck, a motor or an angle head, our parts are manufactured from the finest materials available and are machined to the highest tolerances.

ULTIMATE ERGONOMICS

Dotco drills have long been the industry workhorse for the high-volume, high-repetition, high-precision demands of today's assembly line. Dotco drills are the ergonomic solution to deliver comfort and productivity, while assuring decreased operator fatigue, potential for injury and downtime on the line.

Design features double ball bearings for the spindle, pre-loaded for longer bearing life and more accurate spindle control. Vibration and runout are reduced.

Gears are machined from alloy steel and heat-treated, with fixed cages to control centers for smooth operation.

Time-proven motor and gear design is well-balanced to reduce vibration and extend tool life.

Each tool is individually checked, aligned and adjusted on our assembly line for minimum chuck runout. Vibration is minimized.

Ergonomically critical finger and thumb guides fit the hand and aid in control.

The trigger is practically forceless requiring only 4 ounces of pressure to engage.

Full feathering is accomplished with our pressurized tip-valve design for speed control while drilling.

Housing is made of durable lightweight industrial grade aluminum.

Finger lip under the trigger keeps other fingers from interfering with the trigger action.

Rubber grip acts as a thermal protector and isolates vibration for improved operator comfort.

Handles are shaped to fit the human hand. They are flat where they need to be flat and round where they need to be round ensuring less slippage.

Minimal noise levels enhance operator comfort.

Optional Drill Attachments

For use on Dotco 15LF, 15LS, and 15LN series. Capacity: 1/4" Diameter Drill

These drill attachments can be ordered as a separate accessory item or as part of a complete model. To order as a complete model, use the basic model number from the appropriate 15LF, 15LS, or 15LN catalog page and replace the termination number (-32 for example) with the termination number of the desired optional attachment (-71 for example) from this page.

Microstop Cages

A wide range of Microstop Cages are available for use with Cleco® Dotco™ Pistol Grip Drills. Use for Drilling, Reaming and Countersinking. Cutters are also available for a complete system solution.

These cages have:

- High precision, body in heat-treated chrome steel, fully ground throughout
- Microstop depth adjustment options for .0005 or 0.001 in adjustment
- Microstop depth setting is held securely in place by locknut with seal.
- This patented feature allows an easy loosening of the locknut without damage to the drill cage.

Wide range of Basic Drill cages with varying strokes and metric/inch cutter interface

- For each there are different mounting bases available to suit the needs of the application
- Reduced dimensions for tight access areas.
- Vacuum options to reduce clean up/prevent operator exposure to dust and chips.

RB(I)206 Example of the Range of Base and Options for Customization of the cages

RB(I)256 Example of the Range of Base and Options for Customization of the cages

For full product information refer to the SP401 Aerospace Products Catalog.

A wide range of cutters are available for use with Dotco Pistol Grip Drills.

For product information refer to SP401 Aerospace Products Catalogue.

Cutters with Inserted Pilot for Countersinking for Rivets and Screws in HSS, Carbide and PCD M6 and M8 threads 10-25mm Diameter with 3-12mm pilots	
Cutters with Inserted Pilot for Countersinking for Rivets and Screws in HSS, Carbide and PCD M6 and M8 threads 12-25mm Diameter with 5-14mm pilots	
Spotfacing Cutters with Pilot Insert in HSS, Carbide and PCD M6 and M8 threads 6-38mm Spotface	
Drill and Countersink Cutters in HSS, Carbide and PCD	
Drill, Ream and Countersink Cutters in HSS, Carbide and PCD	
Tapered Drill Reamers	
Fluted Drill Reamers	
Router Cutters	
Wire Brush for Rivet Holes
