TECNA S.P.A. - VIA MEUCCI, 27 - CASTEL SAN PIETRO TERME

TECNA produces and distributes a complete range of BALANCERS having a capacity from 0.2 kg to 180 kg and an available standard wire stroke up to 3 meters. The TECNA BALANCER is an essential device to eliminate the operator's labour, to increase productivity by cutting down tools handling time and to improve work quality. Furthermore, the use of the TECNA BALANCERS reduces hoses and cables wear and avoids eventual damages to both people and tools.

The application of the TECNA BALANCER is absolutely versatile: it may be used for bench or assembly line works and it may be suitably applied to small tools, industrial suspended welders and multiple screw drivers. The ergonomic structure of the TECNA balancers has been designed to facilitate each application of use, ranging from movement easiness to body robustness, from simple use to lifting power.

TECNA, as a primary manufacturer, realizes special as well as customized versions upon demand.

TECNA S.P.A. - VIA GRIMALDI

ATEX COMPLIANT

ATmosphères EXplosibles

WHY ATEX

TECNA was the first to develop a dedicated line with AtEx certification, suitable for use in areas with a potentially explosive atmosphere composed of flammable gases or combustible materials.

TECNA AX BALANCERS, depending on the models, are compatible with most flammable fumes, gases including Propane, Ethylene, Acetylene and Hydrogen (IIC group), as well as flammable dust.

Balancers are meant for safety and ergonomics and they must be able to follow you and your needs in every possible scenario. Therefore TECNA made balancers that can follow you also in dangerous situations, where even the tiniest spark can mean trouble.

AtEx certification, beside other features, requires products to be entirely conductive, grounded and with spark-proof materials. **TECNA AX BALANCERS** line guarantees this and more.

TECNA AX BALANCERS line is perfect for Oil&Gas applications, oil plants and refineries, chemical plants, but also tank washers, as well as situations with flour or flammable powders in suspension.

TECNA AX BALANCERS LINE was the first to obtain AtEx certification in 2009, to supply a solution for use in areas with a potentially explosive atmosphere or where grounding and conductivity are a requirement.

AtEx certification, beside other features, requires products to be entirely conductive, grounded and with spark-proof materials.

TECNA AX BALANCERS LINE guarantees this and more.

TECNA AX BALANCERS line is perfect for electronic assembly.
Overall resistance from ground point to carabiner is below 1 Ohm.

The challenge was to manufacture balancers with the same endurance and performance, which would be compliant with AtEx requirements, in a no-compromise line.

TECNA AX BALANCERS LINE performs equal to the classic **TECNA BALANCERS** line, simply with full compliance with AtEx strict requirement.

TECNA BALANCERS can follow you wherever you go, wherever you work. Just use them and you will see, the only limit is your creativity. And when you don't find an answer, just contact us and we'll listen.

ATEX RETRACTORS

Use your instrument with minimum effort
When released, the load will return to its rest position
